(54) Title: **TETRAHYDROBENZAZEPINES AND THEIR USE IN THE MODULATION OF THE DOPAMINE D<sub>3</sub> RECEPTOR**

(57) Abstract: The invention relates to tetrahydrobenzazepines of the general formula (I) in which the variables Ar, A, B, Y, R<sup>1</sup> and R<sup>2</sup> have the meanings indicated in claim 1, as well as the N-oxides of these compounds, the physiologically tolerated acid addition salts of these compounds and the physiologically tolerated acid addition salts of the N-oxides. The invention also relates to a

pharmaceutical composition that comprises at least one tetrahydrobenzazepine compound of the formula (I), the physically tolerated acid addition salt of (I), the N-oxide of compound of the formula (I) and/or the physically tolerated acid addition salts of the N-oxides of (I), and further to the use of a compound according to the present invention for treating disorders that respond beneficially to dopamine D<sub>3</sub> receptor antagonists or dopamine D<sub>3</sub> agonists. The compounds according to the invention are preferably useful for the treatment of disorders of the central nervous system such as schizophrenia and depression and for the treatment of renal function disorders.
